

Surface resistance and maintenance

Maintenance

The coating of SAVO chairs is easy to keep in its original state but they don't withstand all types of wear. Correct maintenance and cleaning is vital to keep them as original as possible.

Avoid any mechanical wear of all kind. When it comes to fluids like water, coffee and alike try to clean it as soon as possible.

Cleaning

For cleaning of non upholstered surfaces SAVO recommend to clean it with a soft & moist cloth. Don't use strong detergents, it is enough with a small amount of soap.

Detergent

Strong detergents are not to be used and the surface are to be cleaned dry.

Recycling

A good maintenance will help the chairs to last a long time that can be sold again and again. When it is worn out it must be recycled. Follow the local regulations of how to recycle. Our products are made from materials that are easy to separate and to recycle.

Material

SAVO:s chairs are made of wood, metal, plastic, foam, aluminium and textile material.

Upholstered chairs

Dust & dirt are to be removed and fluids are to be removed and cleaned as soon as possible.

Maintenance & washing instructions on savo.com

Washing instructions for textiles are to be found on the textile producers website.

Use the detergent that are relevant for the purpose. Before usage we recommend to try the detergent on a small piece so that it doesn't damage the material.

Another important thing to remember is not to place a chair upholstered in leather too close to heat sources like radiators or in direct sunlight.
